

Joint Stock Company "Cordiant"

## REACH Compliance Declaration

JSC "Cordiant" hereby confirms that:

All tyres produced by the enterprises of JSC «Cordiant», namely the JSC «Cordiant» Yaroslavl Branch (YTP), JSC «Cordiant-Vostok» and JSC «Omskshina», and supplied to EC, are in full compliance with the REACH regulation:

**REACH** is the European Community Regulation on chemicals and their safe use (EC 1907/2006). It deals with the **Registration, Evaluation, Authorization and Restriction of Chemical** substances. The Regulation entered into force on June 1, 2007.

The aim of REACH is to improve the protection for human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances.

In accordance with the Quality Agreements, JSC «Cordiant» establishes a requirement for its suppliers to comply with the REACH standards for raw materials.

Manufacturers and importers are required to gather information on the properties of their chemical substances, which allow their safe handling, and to register the information in a central database run by the European Chemicals Agency (ECHA) in Helsinki.

REACH also contains a list called «Substances of Very High Concern» (SVHC). Any supplier of articles (including tyres) containing SVHC in a concentration of above 0.1% (w/w) must provide the recipient of the article with all the necessary and sufficient information about these substances for registration in accordance with REACH standards.

JSC «Cordiant» constantly monitors the updates of the REACH SVHC list and deliver tyres under the REACH regulation.

Substances releasing H-Nitrosamines are not used in any tyres produced by the Company's enterprises.

The use of aromatic oils has been completely replaced by alternative substances with a low PAH content (polyaromatic carbons).

Non-carcinogenic oil Norman 346 produced by CJSC «Orgkhim» is used in all range of final products.

The chemical analysis of rubber from the finished products carried out by the certified laboratory of Rapra Smithers according to the method of ISO 21461: 2012, confirmed that the tyres manufactured by JSC «Cordiant» meet the requirements for the content of PAHs.

All tyres produced by the enterprises of JSC «Cordiant» comply with the requirements of the current version of the technical regulation of the Eurasian Economic Union "On the safety of chemical products" (TR EAEU 041/2017) also.
